Marriage Tip

Two powerful indicators of the health of any relationship are how those involved communicate and settle conflict. Communication works best when people use positive methods: state clearly what you want or need, don't have serious discussions when one or both people are angry, express your love by telling your husband/wife what you love about them, show gratitude on a daily basis and believe you are on the same team, so a resolution must work for both. positive out of what may seem at first to be a negative. Words can harm or heal, use yours carefully and properly and your relationship will flourish.
